

Career Opportunities in Diverse Industries

by: Steve Snelling

One of the unique aspects of a degree in Industrial & Systems Engineering is that it provides incredible flexibility in terms of the industries where you can find employment. While some ISE graduates work in traditional manufacturing industries such as aerospace, others work in less expected industries like healthcare or even entertainment. Listed below are the wide variety of industries where Industrial and Systems Engineers work:

- Aerospace & Airplanes
- Aluminum & Steel
- Banking & Finance
- Cars & Trucks Assembly
- Construction
- Consulting
- Electronics Assembly
- Energy & Utilities
- Entertainment
- Forestry & Logging
- Insurance & Risk
- Materials Testing & Inspection
- Medical & Healthcare
- Military & Dept. of Defense
- Mining & Raw Materials
- Oil & Gas Distribution
- Plastics, Forming & Components Mfg.
- Retail & Wholesale Stores
- Shipbuilding & Repair
- State & Federal Govt. consulting
- Transportation & Logistics
- Warehousing & Distribution
